Physician Bill Review

Processing a worker's compensation claim doesn't have to be as painful as the injury itself.

Advantage WorkComp Services employs a highly trained reimbursement staff that utilizes a fully integrated payment processing system to ensure provider bills are properly coded.

Our staff evaluates each claim for adherence to applicable fee schedules, proper coding and unbundling of services. All documents filed by providers are carefully reviewed to guarantee that charged services match the codes used on the bill and that treatments are related to the industrial accident. In addition, Advantage's Reimbursement Unit makes sure that services that should be charged under a single code are not unbundled and billed separately.

Using specific fee schedules, Advantage's Reimbursement Unit can evaluate bills for physician services, outpatient surgical facilities,

dental procedures, prescription drugs and supplies and materials for all 50 states on a usual, customary and reasonable (UCR) basis.

Advantage makes the entire process painless. The result is a more efficient, better-managed billing process that ensures physicians are reimbursed for services provided to their patients and that insurance companies are paying the right amounts for properly coded procedures.
